

# Color Grading in ON1 Photo RAW

Transform Your Images with Professional Color Techniques

Before

After

# Introduction to ON1 Photo RAW

## All-in-One Photo Editor

Complete photo editing solution with **RAW processing, layers, masking, and effects**

## Color Grading Capabilities

Professional tools including **Color Balance, Color Enhancer, Split Tone, and LUTs**

## AI-Powered Features

**AI masking · AI noise reduction · AI portrait · AI sky replacement**

## 🔍 vs Traditional Software

Non-destructive workflow · No subscription required  
· Faster processing · Intuitive interface

# Color Balance Tool

## 🔧 What is Color Balance?

Precise control over **color relationships** in different tonal ranges for professional color grading

### Shadows

Adjust colors in **darkest areas** of your image

### Midtones

Modify colors in **middle range** of tonal values

### Highlights

Control colors in **brightest areas** of your photo

Cyan-Red

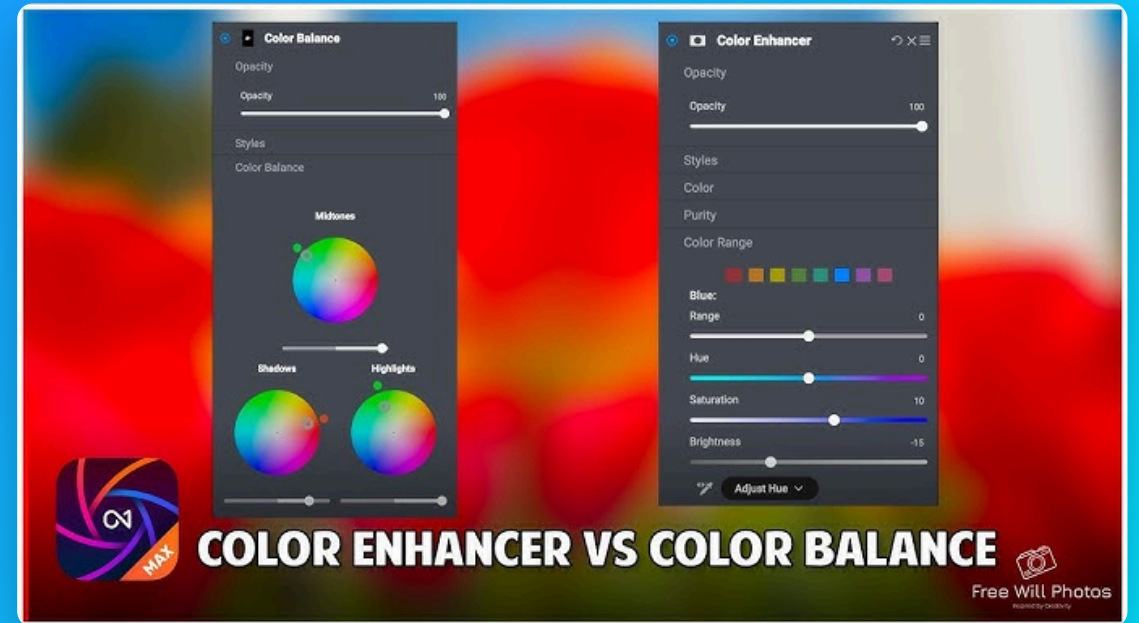

Magenta-Green

Yellow-Blue

## 💡 Pro Tip

Use subtle adjustments for natural-looking results or create dramatic effects with stronger color shifts

# Color Enhancer Tool

## What is Color Enhancer?

Powerful tool for **enhancing colors** and creating **specific looks** in your photos

 **Saturation**  
Control **color intensity** throughout the image

 **Vibrancy**  
Boost **muted colors** while protecting skin tones

 **Warmth**  
Adjust **color temperature** from cool to warm

 **Tint**  
Shift colors between **green and magenta** spectrum

## Perfect For

-  Landscapes
-  Portraits
-  Golden Hour
-  Creative Looks
-  Color Pop
-  Film Emulation

# Split Tone Filter

## What is Split Toning?

Apply **different color tints** to highlights and shadows, creating a **two-toned treatment** for dramatic effect

### Highlights

Choose **color** and **saturation** for bright areas

### Shadows

Select **color** and **saturation** for dark areas

### Balance

Adjust **transition** between highlights and shadows

### Opacity

Control **strength** of the overall effect

## Advanced Techniques

 Brush Masking

 Gradient Masks

 AI Masking

 Radial Masks

 Blend Modes

 Layer Stacking

# LUTs and Edit Color Filter

## LUTs (Lookup Tables)

Cinematic Looks

Film Emulation

Intensity Control

Free LUT Packs

## Edit Color Filter

Target Specific Colors

Hue Adjustments

No Masking Required

Visualize Selection

Saturation Control

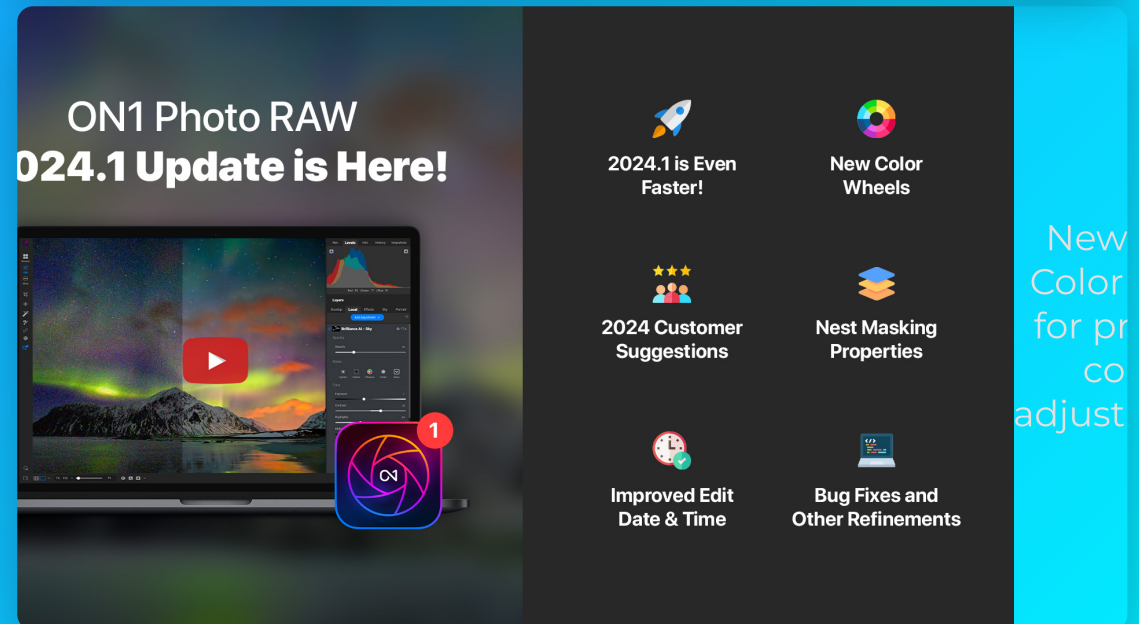

Lightness Adjustments

### Pro Tip

Combine **LUTs** with the **Edit Color Filter** for precise adjustments to specific color ranges in your image

LUTs for cinematic color grading effects

New Color for precise adjustments

# Step-by-Step Workflow

1

## Prepare the Image

Import RAW file · Apply lens corrections · Set white balance · Adjust exposure

2

## Basic Adjustments

**Develop** module · **Tone** adjustments · **Detail** enhancement · **Noise** reduction

3

## Apply Color Grading

Color Balance · Color Enhancer · Split Tone · LUTs · Edit Color

4

## Fine-Tune & Final Adjustments

Effects · Local Adjustments · Layers · Export

### Pro Tip

Work **non-destructively** with layers and masks to maintain flexibility throughout your editing process

# Tips for Professional Results

## Combine Multiple Tools

Use **Color Balance** for overall tone • **Color Enhancer** for vibrancy • **Split Tone** for creative effects • **LUTs** for cinematic looks

## Maintain Consistency

Create **custom presets** • Save your favorite settings • Apply consistent looks across image series • Use **batch processing** for efficiency

## Non-Destructive Workflow

Work with **layers** • Apply **masks** for selective adjustments • Use **adjustment brushes** • Preserve original image data

## 🔊 ON1 Photo RAW vs Others
