Tooltip Library

Complete tooltip and on-screen-text reference for every control in Gradient Converter v3.4.

Toolbar

Control	Tooltip
Black / Grey / White squares	Set the viewport background. Middle grey (#7F7F7F) is the neutral default for judging colour.
ZEBRA	Exposure check on the preview image. Magenta marks the brightest pixels, lime green the darkest.
SOURCE	Hold to see the preview image in its original colours. Release to return to the gradient view.
RESET ALL	Clears all gradients and the image, resets strength, and restores the test pattern.

Load Source

Control	Tooltip
Drop zone	Drop a .grd, .aco, .ase, .cube, or .csv file to extract its colours as gradients.
LOAD SOURCE [L]	Open a file picker for source files. Multiple files can be selected. Keyboard shortcut: L.

Preview Image

Control	Tooltip
LOAD IMAGE	Load a JPEG, PNG, or WebP to preview gradients on. The image is for viewing only — it is not turned into a gradient.
TEST PATTERN	Restore the built-in colour-wheel and tonal-strip test image.

Extracted Gradients

Element	Tooltip
Gradient list	Every palette found in your loaded files. Click one to make it active and preview it.
Five-colour strip	A quick view of each palette, already sorted dark to light.

Active Gradient

Control	Tooltip
Preview / hex row	The active palette at the current export mode, with hex codes for checking.
Preview Strength	Blend the viewport between the original image (0%) and the full gradient (100%). Affects the preview only, not exports.

Sculptor Export

Control	Tooltip
Mode	How many colour points to export: Quintones (5), Tri-tones (3), or Duotones (2).
Group name	A label written into the exported CSV to identify this set.
SAVE ACTIVE — CSV	Save the selected palette as a one-row Lumatic CSV.
SAVE ALL — CSV	Save every loaded palette to one CSV, a row each.
SAVE ACTIVE — LUT (.cube)	Save the selected gradient as a 33-point Lumatic LUT (name_33.cube).

Status Bar Messages

Trigger	Message
Source loaded	LOADED: n GRADIENTS
Preview image loaded	PREVIEW IMAGE: name (w×h)
CSV saved	SAVED: name.csv
LUT saved	SAVED: name_33.cube
All palettes saved	SAVED: n GRADIENTS
Unsupported file	UNSUPPORTED: name
Malformed source	INVALID GRD/ACO/ASE/CUBE/CSV: name — reason
No usable data	NO VALID GRADIENTS LOADED
Image failed	COULD NOT LOAD IMAGE — name
