

IMAGE ANALYST v3.20

TOOLTIP LIBRARY

LUMATICLAB | OFFLINE | REFERENCE EDITION

Top bar

Label / shortcut	Tooltip / assistance text
Load [L]	Open a JPEG, PNG or WebP photograph from this device.
Zebra [Z]	Toggle bright and dark endpoint screening.
Show source [S]	Temporarily display the untouched image preview.
Start over	Restore the built-in test card and defaults.
PDF [E]	Save a PDF report of the selected analysed state.
Help [?]	Open the built-in user guide.
Black / Grey / White	Change viewing surround only; no image data changes.

Analysis and view

Control	Tooltip / assistance text
Colour	Use colour-channel-oriented diagnostics.
B&W	Use luminance-oriented monochrome diagnostics.
Analyse: Source	Measure and export the untouched source state.
Analyse: Tonal Test	Measure and export the simulated tonal state.
Diagnostics	Inspect diagnostic overlays and candidate warnings.
Tonal Test	Experiment with six reversible tonal controls.
Marker intensity	Change marker visibility without changing the original.
Screening sensitivity	Adjust Fringe and Banding screening sensitivity.
Clean	Show image without markers.
RGB limits	Highlight candidate RGB channel endpoints.
Zebra	Show near-black and near-white exits.
Fringe	Show possible colour-edge artifact candidates.
Banding	Show possible tonal-step candidates.
Thirds	Overlay a rule-of-thirds grid.
Tone map	Classify the image into seven tonal bands.
All markers	Show combined diagnostic marker overlays.

Tonal and measurement controls

Control	Tooltip / assistance text
Exposure	Simulate an exposure-like change; not an ON1 setting.
Highlights	Adjust bright tonal regions in the test preview.
Shadows	Adjust darker tonal regions in the test preview.
Whites	Simulate upper-end white point changes.
Blacks	Simulate lower-end black point changes.
Contrast	Simulate global tonal separation.
Auto Test	Try a limited diagnostic tonal proposal; inspect before using conclusions.
Reset tonal	Return all six simulated adjustments to zero.
Source / Test curtain	Move divider: 0% full Test, 100% full Source.
Histogram	Inspect current RGB or luminance distribution.
Tone bands	See the distribution across seven luminance bands.
Markers	Read colours used by screening overlays.
Technical	See dimensions and preview measurement details.
Findings	See image-specific screen results.

Export and caution text

Control	Tooltip / assistance text
File prefix	Choose the base name for downloaded files.
Tone map	Save a tonal-classification PNG for the selected state.
Original	Download an unchanged copy of the original source.
PDF report	Download preview-based analysis as a PDF.

Caution string: “Preview screening only. Verify suspected faults against the original at 100%.”

Status string: “Tonal Test is illustrative; it cannot restore detail missing from the source.”

These are proposed reference tooltip strings; the document does not claim they are already wired as browser title attributes.
